

Hello, nice to meet *you!*

I am **Adrián**. I am Spanish, have lived for 5 years in Copenhagen with my wife and son, and have a **broad experience working across different cultures** — 6 years in Amsterdam before that, and the start of my career in Spain. I thrive in diverse, multi-cultural environments and navigate cultural differences with positivity.

By formation I am a **computer engineer with a Master's Degree in Project Management**. But what defines my professional career more than the credentials is my passion for making teams understand each other, building empathy across functions, and aligning incentives and objectives in the organizations I've been part of.

My career spans 19 years, including over a decade of hands-on software development on high-scalability, high-availability systems for web and mobile applications.

Technical systems are nothing without a **sustainable business model** behind them, and I have hands-on experience across multiple industries: SaaS in fintech, direct-to-consumer e-commerce, cross-country omnichannel e-commerce, mobile advertising, and talent marketplaces.

On the way of working, I am a firm believer in **multi-disciplinary teams and breaking silos**. I have implemented DevOps practices (monitoring, alerting and observability, incident response, everything-as-code, ...) in teams I have been part of, and applied agile concepts pragmatically — favouring *the right agile for the team* over dogma.

To me, **leading is doing what has to be done** — acting in a way that creates trust, empowers people to *dare to try*, and fosters healthy curiosity to always aim to improve.

Having co-founded my own company and been part of scale-ups and start-ups, I am in my comfort zone **balancing speed with cost-control**, paying down technical debt while continuing to innovate on customer-facing value.

If you ask my peers, they'll highlight my **high energy with a can-do mindset, self-driven nature while keeping strong team spirit**, and a genuine interest in making others better. Compared with engineering peers, I get called out for my **strong business sense** — developing sustainable product strategies across the economic, architectural and organizational dimensions.

Hoping to talk to you soon,

Adrián Moreno Peña

Key highlights

- Energetic, with high drive and a strong team-player mindset.
- Software engineer with strong business acumen.
- Adaptable leader focused on evolutionary change and culture shift.
- Comfortable as individual contributor, team manager, or manager-of-managers.
- Multi-sector: SaaS (fintech), direct-to-consumer e-commerce, omnichannel, mobile advertising, talent marketplaces.
- General manager and board-member experience.
- Worked across cultures in international environments, based in 3 countries.
- Multi-disciplinary technologist: mobile, web, system integrations, platform & API.

Adrián Moreno Peña

Engineering Leader

VP-level engineering leader with 19 years scaling SaaS, fintech, e-commerce and mobile — most recently as VP of Technology at Worksome and VP of Engineering at SumUp (unicorn, ~3,000 FTE). Built and led multi-cultural distributed teams across Spain, the Netherlands and Denmark. Hands-on at exec level — 300+ incident responses across roles, agentic-development practice driven at Worksome — combined with strong business acumen and a record of breaking silos between engineering, product and go-to-market.

Work experience

- 2025-now** • **Head of Engineering → VP of Technology Worksome**
Copenhagen, Denmark · Talent marketplace SaaS · Scale-up
VP of Technology reporting to the CTO. Lead a ~10-person Product, Engineering and Design team, aligning business, product and engineering execution so the company scales sustainably.
- Led the acquisition of the 2nd-largest enterprise account by ARR.
 - Contributed to the company's path to profitability — leaner team with capacity built on talent density and AI leverage, not headcount.
 - Drove the adoption of agentic development across Product & Engineering, lifting team throughput.
- 2021-25** • **Engineering Manager → Director of Engineering → VP of Engineering, Tribe Lead SumUp**
Copenhagen, Denmark · Fintech SaaS · Unicorn, ~3,000 FTE
Grew through three levels of scope (EM → Director → VP) over four years, ending with P&L responsibility for the Invoices & Accounting tribe — ~30 FTE across 4 squads, delivering mobile and web experiences inside the SumUp SuperApp. In parallel led the global Incident Response process across Engineering, Risk, Compliance and Operations (~900 FTEs).
- Maintained yearly recurring SaaS revenue through a brand and platform migration, and introducing a new subscription plan.
 - Increased >20% MAU by introducing a new product line.
 - Reduced time required to coordinate incidents by >60%.
- 2019-21** • **Technical Lead → Engineering Manager VanMoof**
Amsterdam, The Netherlands · Direct-to-Consumer e-bikes · Series-A/B scale-up
Insourced the e-commerce and subscription platform for a Direct-to-Consumer brand, integrating ERP, CRM and customer-facing portals across the vertically-integrated experience. Led and coached internal and external teams while structuring engineering through the hyper-growth phase.
- Improved CI/CD times for e-commerce by >50%, reducing downtime by >70%.
 - Led automated QA and code standardization efforts, lowering production defects by 30%.
- 2017-19** • **Technical Lead Emakina.NL**
Amsterdam, The Netherlands · Digital agency · Salesforce ecosystem, ~250 FTE
Technical Lead on the agency's largest contract — an international e-commerce, CRM and service platform in the Salesforce ecosystem (SFCC, Service Cloud, Mulesoft). Oversaw enterprise architecture, accessibility, technical scoping and team coaching; partnered with Marketing on e-commerce KPIs and ad spend.
- Championed accessibility improvements, achieving WCAG 2.1 level AA compliance.
 - Integrated with PIM and DAM systems, lowering time to market new campaigns.
- 2015-17** • **CTO Pocket Media**
Amsterdam, The Netherlands · Mobile advertising agency · Startup, ~25 FTE
Led the technology org (~15 FTE) of a mobile advertising agency as part of the Management Team — defining strategy, product roadmap, hiring and execution. Delivered high-scale mobile and web platforms for targeted advertising and near-real-time big data reporting.
- Development of a new SaaS platform for Native advertisement (Android, iOS, web, Unity).
 - Operated in-house applications and games with thousands of DAU.
 - Performance improvement of +1000% (by re-platforming PHP → Golang).
- 2015** • **Senior Mobile Applications Developer · The Mobile Company**
Amsterdam, The Netherlands · Mobile development agency for top tier Dutch apps
- 2011-15** • **Co-Founder, Technical Lead · Zadia Software** · Santiago de Compostela, Spain · *Bootstrap software development studio*
- 2007-11** • **Analyst Programmer · Bahia Software, Coremain** · Santiago de Compostela, Spain · *Regulated environment software development and consulting (public, banking, healthcare)*

Skills

Leadership

P&L ownership, Engineering strategy & roadmap, Org design, Stakeholder management, Hiring & talent density, Manager-of-managers leading, Incident response, Coaching & performance

Tech & methods

Agile / Scrum, DevOps, CI/CD, observability, AWS, serverless, cloud architecture, High-scalability web & API, Mobile (iOS, Android, BLE), Salesforce SFCC, Magento, Drupal, AI tooling & leverage

Domains

SaaS, Fintech, E-commerce (D2C, omnichannel), Mobile advertising, Subscription products, Agency & consulting
